PROJECTS

PERSONAL PORTFOLIO WEBSITE

Designed and deployed a responsive personal portfolio website using HTML, CSS and JavaScript. Integrated smooth animations and a clean UI/UX to showcase experience, personal skills, projects and certifications
GitHub – <https://kashif7230.github.io/Portfolio-website/>

SALARY PREDICTION

Developed a Flask-based machine learning application that predicts salaries using a Random Forest model. Implemented a complete training pipeline, built an interactive front-end with responsive design, and integrated model deployment for real-time predictions
GitHub – <https://github.com/kashif7230/salary-prediction>

CREATION PORT

A custom-built, professional web development project showcasing your skills in front-end development. Designed responsively using HTML, CSS, and JavaScript, the Creation Port site enables users to explore, create, and present their own portfolio
GitHub – <https://github.com/kashif7230/Creation-Port>
