PROFESSIONAL SUMMARY

BSc Computer Science undergraduate with experience in e-commerce operations, technology internships, data analysis, and customer-focused problem solving. Skilled in Microsoft Excel, Python, SQL, data handling, and process improvement, with strong attention to detail, communication, teamwork, and adaptability. Experienced in managing operational tasks, analyzing data, following structured processes, and delivering accurate results in fast-paced environments.

EXPERIENCE

E Commerce Store Manager – Amazon & Flipkart

Sep 2024 – Mar 2026

Managed day-to-day operations across Amazon and Flipkart, ensuring accurate product listings, order info and store records. Monitored customer requirements, product information, and operational issues to support timely resolution. Applied SEO and data-driven optimization techniques to improve product visibility and store performance.

AI & Cloud Technology Intern – IBM

Jul 2025 – Aug 2025

Worked with cloud-based platforms, the storage systems, deployment workflows, and version control process. Supported technical tasks require accuracy, documentation, troubleshooting and structure problem solving. Collaborated on technology workflows and adapted to new tools and process in a professional environment.

AI & Machine Learning Intern – IBM

June 2025 – July 2025

Prepared and analyzed structured data set through data preprocessing, feature engineering, model training and evolution. Applied analytical and problem-solving skills to identify patterns and evaluate model performance. Worked with structure workflows to maintain data quality and produce accurate results.

PROJECTS

FRAUDGUARD – Fraud Detection & Risk Analysis System

Developed a fraud detection system to identify suspicious patterns in transaction data using Z-Score and Isolation Forest. Processed and analyzed transaction datasets using Python, Pandas, NumPy, and Scikit-learn. Achieved approximately 92% fraud-risk detection accuracy on the project dataset. Build an interactive application to visualize fraud-risk insights and support data-driven decision-making.

Tech Stack: Python, Pandas, NumPy, Scikit-learn, NetworkX, Flask/FastAPI, Plotly/Matplotlib.

Live Demo: <https://luxury-pasca-537006.netlify.app/> | **GitHub:** <https://github.com/kashif7230/FraudGuard>

QUANTUM SOLAR GRID AI - Intelligent Energy Optimization System

Developed a data-driven system for energy allocation, resource optimization, and decision-making under constraints. Implemented optimization techniques using Python and Qiskit to evaluate resource allocation scenarios.

Achieved approximately 20–30% reduction in simulated grid dependency and presented the prototype at an IIIT Delhi

Tech Stack: Qiskit, Pandas, NumPy, Scikit-learn, Plotly, Matplotlib, Optimization Algorithms, Time Series Analysis, Git

GitHub: <https://github.com/kashif7230/quantum-solar-grid>

EDUCATION

Bachelor of Science in Computer Science – Fourth Year (August 2023 - July 2027)

SKILLS

Technical: Python, C++, JavaScript, REST APIs, HTML, CSS | **Database & Concepts:** DBMS, DSA, OOPs, Agile/Scrum

Business & Operations: Customer Service, Problem Solving, Process Improvement, Attention to Detail, Data Analysis, Documentation, Team Collaboration | **Data & Productivity:** Excel, MS Office, SQL, Python, Pandas, Data Visualization

Data & Development: Git, GitHub, Firebase, DBMS, Data Structures & Algorithms, OOPs

Tools: Git, GitHub, Jupyter Notebook, VS Code, Firebase
